

# Your Social Media MANAGER

One Click offers Social Media Management Software to organize, post, and respond to clients throughout various social media channels.

## SOCIAL MEDIA MANAGEMENT PROGRAM

### Bulk Scheduling & Auto Posting

Ever wonder about life's purpose while mindlessly clicking buttons to upload content throughout your social media accounts? Us too. Our software's key features focus on bulk schedule posting. Schedule content releases for multiple platforms simultaneously, weeks in advance!

### Team Management & Approvals

As a Content Manager, it can be frustrating when your team makes publishing errors without getting the proper approval before posting. Our Team Management Software guarantees you have the final say. Ensure top quality content is being delivered to the appropriate target audience it's meant for by reviewing all drafts before final approval.

### Centralized Social Inbox

Switching between multiple social media platforms to message different people can be quite frustrating. Our software allows you to streamline all your Instagram and Facebook messages into one social inbox.
